

manta bay

vela d'acqua

L'architettura tessile e la tecnologia nautica si incontrano in **Manta Bay**. Il risultato è oltre una chaise longue e oltre una piscina. Noi l'abbiamo chiamato "Vela d'acqua". **Manta Bay** può essere allestita ovunque, in semplice appoggio, senza bisogno di un impianto di cantiere. E' facile da smontare a fine stagione, limitando i costi di manutenzione. Il kit viene consegnato con un sistema di ricircolo e sanificazione dell'acqua.

*Textile architecture and sailing technology come together in **Manta Bay**. This gives a new concept for wellness: beyond a chaise longue and tub as well. We call it "Sail of Water". **Manta Bay** can be set up everywhere, simply above ground, no working site required. At the end of bathing season it can be easily removed, so to reduce costs of keeping. The kit is delivered including the water recycling system.*
